# TPRM by ThirdPartyTrust

ALL OF YOUR VENDORS IN ONE DASHBOARD

ThirdPartyTrust is a third party risk management tool for process automation, document storage, and workflow management.
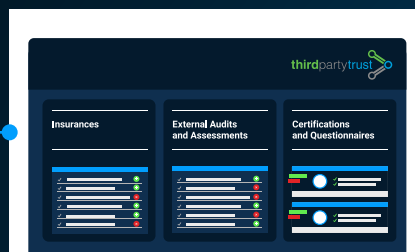

Automate your end-to-end process and reduce the time spent on requesting and reviewing security questionnaires, allowing for greatly accelerated document access and diligence.

Gain access to 16,000+ vendor security profiles already assessed by the network and insights from 10+ integrated data providers, including BitSight, RiskRecon, SpyCloud, and more.
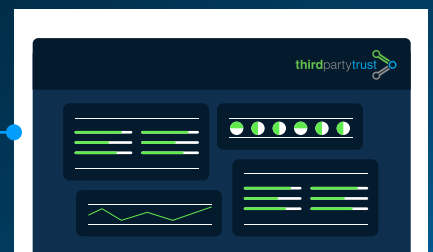

Control your supply chain in three easy steps

1 BUILD
Build your third-party inventory by inviting your vendors to the platform and connecting with them.

2 REVIEW
Review their uploaded documents, such as insurances, certifications, and questionnaires, all in one place.

3 ANALYZE
Analyze your data in a single dashboard to get the full picture of your vendors' security postures.
