# Guest Network and Deception Infrastructure Attestation

[DATE]

To BitSight Customer Support:

I am writing on behalf of [INSERT RATED ENTITY LEGAL NAME] ("Company"), which is being monitored by BitSight Technologies, Inc. ("Bitsight") as part of its services.

Bitsight regularly works with entities that are both customers and non-customers to update their list of IP addresses and other assets incorporated into the Bitsight service. As part of the Bitsight service, Bitsight may attribute guest network assets (e.g., Internet Protocol Addresses) (hereafter "Guest Network") and/or honeypot infrastructure (hereafter "Deception Infrastructure") as part of a company's cybersecurity infrastructure, which contributes to a company's overall security rating. Company hereby requests Bitsight to identify and update assets associated with its Guest Network and/or Deception Infrastructure as non-rating impacting asset(s).

Company hereby attests that the assets contained in Exhibit A, attached hereto, are part of its Guest Network and/or Deception Infrastructure, which (i) cannot be attributed to any other corporate use, and (ii) are under the control of Company. Company understands that this attestation is valid for *one year* from the date of signing and agrees to notify Bitsight promptly if there are any changes to the status of the assets. Company understands that after *one year* the assets in Exhibit A will no longer be considered Guest Network and/or Deception Infrastructure assets, unless Company provides a new attestation or Bitsight determines otherwise.

By signing below, Company (a) represents, warrants, and covenants that the undersigned is authorized to bind Company, (b) acknowledges that Bitsight will independently review and verify Company's designated Guest Network and/or Deception Infrastructure assets, and (c) acknowledges that, after completing such independent review and verification procedures, Bitsight may, in its sole discretion, determine that some or all of Company's designated Guest Network and/or Deception Infrastructure assets do not meet such criteria for such designations and decline to identify and update them as non-rating impacting assets.

Please contact me at the phone number or email address under my signature below with any questions. I understand that this attestation must be signed and returned to support@bitsighttech.com, in order for such consent to be valid.

Best Regards,
