

Customers API Endpoint

Publication Date - September 11, 2019

Customers API Endpoint

Use this endpoint to manage your Company API tokens.

Company API tokens are not user-specific. They can be used without breaking existing integrations if certain users' accounts are deactivated. For example, one Admin (Customer Admin) might generate a token for their Archer integration. If that Admin leaves the company, the token can either continue to be used or it can be revoked by another Admin.

Only Admin (Customer Admin) can manage Company API tokens.

URL

`https://api.bitsighttech.com/ratings/v1/customers/current/api-tokens`

Paths

Path	Purpose	Description	Method
<code>/current/api-tokens</code>	Company API Tokens	Get a list of the Company API tokens for your BitSight account.  Note: Company API tokens do not include the API tokens of all users in your account.	GET
<code>/current/api-tokens</code>	Create Company API Tokens	Create a Company API token for your BitSight account.	POST
<code>/current/api-tokens/{api-guid}</code>	Revoke Company API Tokens	Revoke a Company API token from your BitSight account.	DELETE

GET: Company API Tokens

[← Customers API Endpoint](#)

Get a list of the Company API tokens for your BitSight account.

Note: This endpoint does not include User API tokens.

URL

`https://api.bitsighttech.com/ratings/v1/customers/current/api-tokens`

Parameters

Parameter	Description	Requirement	Parameter Type	Data Type
format	The format for the response data.	Optional	Query	String

Example Request

```
curl https://api.bitsighttech.com/ratings/v1/customers/current/api-tokens -u {api_token}:
```

Example Response

```
[
  {
    "description": "Jane's API Token",
    "guid": "aaaaaaa-1111-bbbb-2222-cccccccccccc",
    "token": "*****alb2",
    "created_date": "2019-09-06T15:02:18Z",
    "creator_name": "Jane Smith",
    "group": "All Companies"
  }
]
```

Key	Description	Data Type
description	A description of this Company API token.	String
guid	The unique identifier of this Company API token.	String
token	The Company API token value.  Note: This value is masked, with the last 4 characters visible. The full token is viewable via API only upon creation.	String

created_date	The date when this Company API token was generated.	String [YYYY-MM-DD THH:MM:SSZ]
creator_name	The full name of the user who generated this Company API token.	String
group	The Access Control Group this token belongs to.	String

POST: Create Company API Tokens

[← Customers API Endpoint](#)

Create a Company API token for your BitSight account.

Only Admin (Customer Admin) can create Company API tokens.

URL

`https://api.bitsighttech.com/ratings/v1/customers/current/api-tokens`

Parameters

Parameter	Description	Requirement	Parameter Type	Data Type
data	Contains descriptors of the Company API token.	Required	Body	Object
description	A description of the Company API token.	Required	Body	String
group	The name of the Access Control Group this token should apply to. If the value is "null," the token will be assigned to the default access control group.	Optional	Body	String
format	The format for the response data.	Optional	Query	String

Example Request

```
curl -X POST
'https://api.bitsighttech.com/ratings/v1/customers/current/api-tokens' -u
{api_token}: --header "Content-Type:application/json" --data-ascii
'{"description": "Jane's API Token", "group": "{ACG_name}"}
```

DELETE: Revoke Company API Tokens

[← Customers API Endpoint](#)

Revoke a Company API token from your BitSight account.

Only Admin (Customer Admin) can revoke Company API tokens.

URL

`https://api.bitsighttech.com/ratings/v1/customers/current/api-tokens/{api-guid}`

Parameters

Parameter	Description	Requirement	Parameter Type	Data Type
api-guid	The unique identifier of the Company API token that will be deleted.	Required	Path	String
format	The format for the response data.	Optional	Query	String

Example Request

```
curl -X "DELETE"  
https://api.bitsighttech.com/ratings/v1/customers/current/api-tokens/{api-guid}  
-u {api_token}:
```
